

## California School IPM Model Program Guidebook

### TABLE OF CONTENTS

25 July 2001 version

Introduction (Who this book targets, *its goals, a summary of AB 2260, and requirements of the law*)

How to Develop an IPM Program

What Is Integrated Pest Management?

Components of an IPM Program

Developing and Adopting an IPM Policy Statement

Selecting and Training an IPM Coordinator

IPM Contract Performance Specifications

*Establishing a Community-Based School District Advisory Committee*

*Establishing a Community-Based Standard for Notification and Posting*

Developing a Pest Management Plan For Least-Hazardous Pest Control Choices

Program Review/Evaluation

An Example Evaluation of a School IPM Program

Monitoring Pest Populations and Damage

What is Monitoring?

Why Monitor?

What to Monitor

Identifying the Target Pest

Sample Monitoring Forms

Inspection Checklist for Detecting Structural Decay and Structural Pest Damage

*IPM Inspection Checklist for School Sites (from IL Web site, MD, others?)*

Record Keeping

Setting Injury and Action Levels

Determine Injury Levels First

Determine Action Levels Based on Injury Levels

Assessing Cost Effectiveness

Selecting Treatment Strategies

Criteria for Selecting Treatment Strategies

Timing Treatments

Habitat Modification

Modification of Horticultural Activities

*Pest Management Decision-Making Process (flowchart?)*

#### Indoor Pest Management

IPM for Ants in Schools (*including fire ants*)

Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Cockroaches in Schools

Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Clothes Moths and Carpet Beetles in Schools

Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Fleas in Schools

Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Flies in Schools

Garbage and Manure-Breeding Flies: Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

Fruit Flies, Cluster Flies and Phorid Flies: Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Head Lice in Schools

Identification and Biology \* How Lice are Transmitted \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Rats and Mice in Schools

Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Scorpions in Schools

Identification and Biology \* Stings \* Detection and Monitoring \* Management Options \*

IPM for Silverfish, Firebrats, and Booklice in Schools

Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

IPM for Wood Damaging Pests in Schools (*update termites*)

Wood-Attacking Fungi: Identification and Biology \* Damage \* Detection and Monitoring \* Management Options

Termites: Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

Wood-Boring Beetles: Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

### Outdoor Pest Management

IPM for Lawns in Schools

Detection and Monitoring \* Management Options

Chinch Bugs: Identification and Biology \* Damage \* Detection and Monitoring \* Management Options \*

Fusarium Blight: Identification and Biology \* Management Options \*

IPM for Spiders in Schools

Removal of a Non-Dangerous Spider \* General Spider Management \*

Black Widow Spiders: Identification and Biology \* Bites \* Detection and Monitoring \* Management Options \*

Brown Recluse or Violin Spiders: Identification and Biology (*geographical distribution, i.e. not California?*) \* Bites \* Detection and Monitoring \* Management Options \*

Aggressive House Spider: Identification and Biology \* Bites \* Detection and Monitoring \* Management Options \*

IPM for Trees and Shrubs on School Grounds

Plant Health Care (PHC) Management \* Components of a PHC Program \* Conclusion

IPM for Vertebrate Pests (pocket gophers, ground squirrels, birds...?)

Identification and Biology \* Detection and Monitoring \* Management Options \*

IPM for Weeds on School Grounds

Identification and Biology \* Detection and Monitoring \* Management Options \*

IPM for Yellowjackets and Hornets in Schools

Identification and Biology \* Stings \* Nest Disturbance \* Detection and Monitoring \* Management Options \*

### **Appendices**

How To Collect And Preserve Specimens For Identification

Head Lice Information Packet for Schools

IPM-Related Curricula and Resources for the Classroom

Training and Licensing Opportunities

Pesticide Information Resources

*Reduced-Risk Materials and Tools*

Recommended Reading List
